

LEGAL NOTICE

STATE OF LOUISIANA, DEPARTMENT OF CONSERVATION AND ENERGY, BATON ROUGE, LOUISIANA.

In accordance with the laws of the State of Louisiana, and with particular reference to the provisions of Title 30 of Louisiana Revised Statutes of 1950, a public hearing will be held in the Hearing Room, 1st Floor, LaSalle Building, 617 North 3rd Street, Baton Rouge, Louisiana, at 9:00 a.m. on **TUESDAY, APRIL 28, 2026**, upon the application of **ADAMAS ENERGY LLC**.

At such hearing the Department of Conservation and Energy will consider evidence relative to the issuance of Orders pertaining to the following matters relating to the **Haynesville Zone, Reservoir A**, in the Elm Grove Field, Caddo and Bossier Parishes, Louisiana.

1. To authorize applicant to drill, designate and utilize one cross unit horizontal well to serve as a substitute unit well for HA RA SU110, and as an alternate unit well for the HA RA SU67, and two cross unit horizontal wells to serve as alternate unit wells for HA RA SU110 and HA RA SU67, at the locations and in the general manner shown on the plat submitted with the application, or at any other legal locations within such units, and to approve exceptions to the spacing provisions of Office of Permitting and Compliance Order No. 361-L, effective July 29, 2008, as to the common boundary of the units which will be served by the cross unit horizontal wells, provided that said cross unit horizontal wells will be perforated no closer than 330' from any unit boundary other than the common boundary between the affected units, except as requested in Paragraph 2 below.
2. In addition to the request for exceptional locations as to the common boundary between the affected units, the applicant requests an exception to the well spacing provisions in Order No. 361-L to allow the first and last perforation point or take point in the proposed cross unit horizontal wells to be located no closer than 100' from the north and south unit lines and no closer than 200' to any well on a competitive unit completed in, drilling to, or for which a permit has been granted to drill to the Haynesville Zone, Reservoir A.
3. To find that the proposed horizontal wells are necessary to efficiently and economically drain a portion of the Haynesville Zone, underlying the units on which it is proposed to be drilled which cannot be efficiently and economically drained by any existing well on such units, will prevent waste, avoid the drilling of unnecessary wells, protect correlative rights and promote the full and efficient development of the natural resources of this state.
4. To provide that if the horizontal portion of a well is cased and cemented back above the top of the Haynesville Zone, Reservoir A, the distance to any unit boundary and offset well(s) will be calculated based on the distance to the nearest perforation in the well and not on the penetration point or terminus of the well in the Haynesville Zone, Reservoir A.
5. To provide that production from the proposed wells shall be separated and metered individually and that this information shall be reported in the manner prescribed by the Office of Permitting and Compliance.
6. To provide that the unit allowables for the units to be served by the proposed wells may be produced from the unit/substitute well, from any alternate unit well, or from any combination of such wells serving the unit, at the discretion of the operator.
7. To provide that production from a cross unit horizontal well shall be allocated to each unit penetrated by the well in the same proportion as the perforated length of the lateral in each such unit bears to the total length of the perforated lateral as determined by an "as drilled" survey performed after the well has been drilled and completed.
8. To approve exceptions to the Department of Conservation and Energy policy with respect to a single operator per unit to allow Comstock Oil & Gas-Louisiana, LLC to operate its HA RA SU67;Franks 11-16-13-H No. 1 Well (SN 240179), and to allow EnSight IV Energy Management, LLC, to operate its proposed cross unit horizontal well to serve as an alternate unit well for HA RA SU110 and HA RA SU67, at the location and in the general manner shown on the plat submitted with the application, and for applicant to operator the wells proposed herein.
9. Except insofar as set forth above, to confirm and continue in full force and effect the provisions of Order No. 361-L, effective July 29, 2008, as amended and supplemented by the 361-L Series of Orders, the units created thereby, and of all applicable Statewide Orders.
10. To consider such other matters as may be pertinent.

The Haynesville Zone, Reservoir A was defined in Order No. 361-L, effective July 29, 2008.

A plat is available for inspection in the Office of Conservation in **Baton Rouge** and **Shreveport**, Louisiana.
